NUREG-0737 ITEM II.F.1.5  
CONTAINMENT WATER LEVEL MONITORING

Dear Mr. Eisenhut:

As discussed with members of your staff, Carolina Power & Light Company (CP&L) has revised the completion schedule provided in our April 23, 1982 letter for NUREG-0737 Item II.F.1.5, Containment Water Level Monitoring for Brunswick-2. Due to the early shutdown of Brunswick-2 for snubber inspections and a recirculation pump seal replacement, a spring 1983 outage for Brunswick-2 is being planned to complete several TMI-related modifications. Accordingly, Item II.F.1.5 will be completed for Brunswick-2 no later than June 1, 1983.

If you have any questions concerning this revised schedule, please contact our staff.

Yours very truly,

E. E. Utley  
Executive Vice President  
Power Supply and  
Engineering & Construction
