In re: Harry Dillon, et al vs. Union Electric, et al.;
Fred Lawson

SEARCHED	INDEXED
SERIALIZED	FILED
JUL 23 1982	
FBI - ST. LOUIS	

Dear Mr. Keppler:

Under the Freedom of Information Act we would like a copy of all inspections made by OSHA of the Union Electric Callaway County Nuclear Power Plant, and any related documents that can be received through the Freedom of Information Act concerning all inspections made by OSHA at the Union Electric Callaway County Nuclear Power Plant, Callaway County, Missouri.

In addition, we would like any information regarding how you go about letting the employees of Daniel International know beforehand that you're coming to make an inspection. It is our information that some of the employees, whose names and addresses I'll furnish to you if you wish, knew in advance that OSHA was coming. Is there some document or other means of identifying when, where, and how they were notified in advance that your inspectors were coming? Please furnish this information and any documents supporting it and any explanation that you have for this occurrence. Also we would like to know if any action would be taken by OSHA if enough sworn statements are produced to establish this allegation. Looking forward to receiving these documents and any other relevant information you can furnish, I am

Very truly yours,

Vincent M. Igoe

VMI/r1

P.S. We are particularly interested in any photographs and witness statements that you have.
