Subject: Application for Special Nuclear Materials License for Yugoslavia

Dear Mr. Zimmerman:

General Atomic Company (GA) makes application, pursuant to 10 CFR 110, for license to cover shipment of standard TRIGA fuel elements to Yugoslavia.

GA is engaged in the manufacture and sale of nuclear reactors, nuclear instrumentation systems, components therefor, and cooperative research in the development and testing of the components and fuels for research reactors. In the normal servicing of our research reactors we are required to provide replacement equipment and materials. We presently have orders for fuel elements for Yugoslavia for the reactor that they purchased from us some years ago. We therefore request that you issue a license at your earliest convenience.

Most recently we have shipped fuel to Yugoslavia under XSNM-01230. At that time we were shipping fuel elements with high enriched uranium. Our present shipment involves fuel elements with low enriched uranium.

We look forward to your early action on this license request. If you have questions, please contact me at 714-455-2823.

Very truly yours,

William R. Mowry
