I have read the NUREG that you folks prepared (title page enclosed).

Some of your names appear familiar to me as persons with whom I was associated in AEC/NRC.

So, I thought I'd comment on the NUREG. I think you did a pretty good job in summarizing the comments from the workshops. Now, I wish I had attended one, if only to say that unless decontamination removes all residual radioactive material so that the only radiation left is that from background-then the criteria is not worth a wagon load of Missouri mule dung!

If it isn't too late maybe you can add my comment in an addenda to your summary.

Best of luck,

John Vaden, LLW Project Mgr.
