

DOCKET NUMBER  
PROPOSED RULE PR 20  
(59 FR 4868)

16

RD 2, Box 132 '94 MAR 11 P2:09  
Clearville, PA 15535  
March 2, 1994

USNRC  
The Secretary of the Commission  
Washington, DC 20555

Attn: Docketing and Service Branch

Dear Sir:

The current proposed regulations concerning the decommissioning of nuclear power sites are very alarming to us. It is our understanding that the NRC proposal documented in the Federal Register, Vol 59 Number 19, of Friday, January 28, 1994, Notices-Docket #50-142 Vol 19-23 would have the net effect of adding 30% more radioactivity to background levels.

This level of radioactivity is not acceptable to anyone but the cost-avoidance interests of the nuclear power industry. Nuclear sites must be cleaned to the original level of radioactivity, as to do less than this would endanger the health of persons using these sites in the future.

Sincerely,

*Karl J. Novak*
