Subject: NRC Export License XSNM01541, UK(ICI); Request for Amendment

Dear Mr. Zimmerman:

General Atomic Company (GA) makes application, pursuant to 10 CFR 110, for amendment to subject license to extend expiration date for three years from date of issuance of amendment.

General Atomic is engaged in the manufacture and sale of nuclear reactors, nuclear instrumentation systems, components therefor, and cooperative research in the development and testing of the components and fuels for research reactors. In the normal servicing of our research reactors we are required to provide replacement equipment and materials. In this instance we will continue to supply standard TRIGA fuel elements to the reactor at the ICI facilities in the United Kingdom.

We presently have fuel elements being fabricated for shipment and will appreciate it if you will expedite the issuance of the amendment to this license.

If you have additional questions, please contact me at 714-455-2823.

Very truly yours,

William R. Mowry
