

REPLY TO A NOTICE OF VIOLATION

March 17, 1994

Boston Fertility Laboratories, Inc. License No. 20-28322-01
One Brookline Place / 6 Huron Drive Docket No. 030-30923
Brookline, MA 02146 / Natick, MA 01760 Control No. 119278

1) Reason for Violation

Boston Fertility Laboratories, Inc., failed to apply for an amendment to its license for a change of location for use of licensed materials to 6 Huron Drive, Natick MA 01760, when the facility moved in February 1992. It was a purely unintentional oversight. There was no intent to purposefully deceive or mislead the NRC. We have always tried to be completely compliant with the NRC regulations in handling licensed materials during the term of our license. We are deeply embarrassed that this oversight went unnoticed for so long. We are committed to being more vigilant in the future in reviewing and adhering to the conditions of our license and to the regulations of the NRC.

2) Corrective Steps to be Taken

A complete license renewal and amendment application for the new location was submitted to the Region I office. We received an acknowledgement of the receipt dated March 8, 1994.

3) Corrective Steps to Avoid Further Violations

In the event of a future lab re-location, Boston Fertility Laboratories, Inc., will submit a complete application for license amendment to the NRC in advance of the move.

4) Date for Full Compliance

With the submission of the license renewal and amendment, the inspection conducted by Mr. Ihor Czerwinskyj in February, and the submission of the document, we feel we have achieved full compliance at this time.

Respectfully submitted,

Anne M. Farrer, BA, MT(ASCP)
