Dear Mr. O'Reilly:

BELLEVILLE NUCLEAR PLANT UNITS 1 AND 2 - SUPPLEMENTAL INFORMATION ON
VIOLATION 50-438, 50-439/82-18-01 - FAILURE TO FOLLOW PROCEDURE FOR HANGER
INSPECTIONS

This is in response to D. M. Verrelli's letter dated July 26, 1982, report
numbers 50-438/82-18, 50-439/82-18, concerning activities at the Belleville
Nuclear Plant which appeared to have been in violation of NRC regulations.

Our response to the violation dated September 13, 1982, stated that parts A
and D of "Steps Taken to Avoid Further Violations" would be in effect by
December 29, 1982. However, as discussed with NRC-OIE Inspector Paul
Fredrickson on December 28 and 29, 1982, this date could not be met. Below
is supplemental information and a revised completion date regarding these
two commitments.

Part A

The drafts of lesson plans for the training program have been completed and
are being reviewed within the unit for content. This process is taking
longer than previously estimated and, accordingly, the program will be in
effect by January 31, 1983. The proper training of individuals will be an
ongoing activity.

Part D

The reinspection effort has been completed; however, evaluation of the
results and review of acceptance criteria in the detail necessary to
reclassify some of the quality control inspections to engineering
inspections is taking longer than anticipated. Accordingly, these actions
will not be complete until January 31, 1983.
