1450 Maria Lane, Suite 210
Walnut Creek, CA 94596

Subject: NUCLEAR PROJECT NO. 2
DOCKET NO. 50-397
NRC IE BULLETIN NO. 82-04, DEFICIENCIES IN
PRIMARY CONTAINMENT ELECTRICAL PENETRATION

The subject bulletin identified a problem relative to electrical penetrations supplied by the Bunker Ramo Company. Requested action included 1) to take appropriate action with respect to deficiencies found if WNP-2 utilizes hard epoxy containment electrical penetration assemblies manufactured by the Bunker Ramo Company, or 2) submitting reports stating that such assemblies are not used at WNP-2.

Regarding the requested action, WNP-2 utilizes only Westinghouse penetrations. Therefore, the problem addressed in the subject bulletin does not apply to Supply System Nuclear Project No. 2.

R.G. Matlock
Program Director, WNP-2
