Simmons of this office on February 17, 1994, of activities authorized by NRC Byproduct Material License Nos. 48-02000-01 and 48-0200-02, and to the discussion of our findings with Dr. D. The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.
