ATTN: Mack Richard  
Radiation Safety Officer  
541 Clinical Drive  
Indianapolis, IN 46202

License No. 13-02752-08  
Docket No. 030-09792

Dear Mr. Richard:

This refers to the routine safety inspection conducted by S. J. Mulay of this office on February 18, 1994, of activities authorized by NRC Byproduct Material License No. 13-02752-08, and to the discussion of our findings with you at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions taken regarding certain apparent violations found during our January 1993 inspection. We have no further questions regarding these matters. Your letter dated February 15, 1994 requesting an enforcement hearing in response to our Order Imposing Civil Monetary Penalty will be addressed in a separate correspondence.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Original Signed by

B. J. Holt, Chief  
Nuclear Materials Inspection
