Thomas M. Novak  
Assistant Director for Operating Reactors  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Novak:

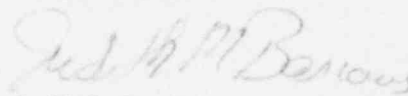

In an April 22, 1982, letter to John H. Garrity of the Maine Yankee Atomic Power Company you stated that a task force on Pressurized Thermal Shock would soon be visiting Maine Yankee to conduct an audit of the adequacy of in-plant training programs and operating procedures with regard to Pressurized Thermal Shock.

Has that audit taken place? If so, please either send me a copy of the report of the audit or let me know how I may obtain a copy. If not, when is it now scheduled to occur?

I would also appreciate copies of any other recent material with regard to the Pressurized Thermal Shock problem, especially as it relates to the Maine Yankee Atomic Power plant.

Thank you in advance for your prompt attention to this matter.

Sincerely,

  
Judith M. Barrows

Docket No. 50-309
