Florida Power and Light Company  
ATTN: Dr. R. E. Uhrig, Vice President  
Advanced Systems and Technology  
P. O. Box 14000  
Juno Beach, FL 33408

Gentlemen:

Subject: Report No. 50-389/82-45

This refers to the routine safety inspection conducted by Mr. R. W. Wright and others of this office on October 4-8, 1982, of activities authorized by NRC Construction Permit No. CPPR-144 for the St. Lucie facility and to the discussion of our findings held with Mr. B. J. Escue, Site Manager, at the conclusion of the inspection.

Areas examined during the inspection and our findings are discussed in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

During the inspection, a violation was identified involving failure to control welding activities. As discussed in paragraph 6.b of the enclosed report, this problem is very similar to a violation discussed in Inspection Report No. 389/82-43 and the Notice of Violation transmitted by our letter dated September 29, 1982. Mr. C. A. Julian of this office confirmed in a telephone call on October 27 to Mr. R. J. Stevens, Licensing Engineer, that this additional example will be addressed in your response to our September 29 letter. Based on this understanding, a separate Notice of Violation will not be issued.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC's Public Document Room unless you notify this office, by telephone, within ten days of the date of this letter and submit written application to withhold information contained therein within thirty days of the date of this letter. Such application must be consistent with the requirements of 10 CFR 2.790(b)(1).

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

Original signed by Dance

R. C. Lewis, Director  
Division of Project and  
Resident Programs
