NOTICE OF VIOLATION

Bio-Science Laboratories

License No. 24-16798-01

As a result of the inspection conducted on August 17, 1982, and in accordance with the NRC Enforcement Policy, 47 FR 9987 (March 9, 1982), the following violations were identified:

1. 10 CFR 71.5(a) requires that no licensee shall transport any licensed material outside of the confines of his plant or other place of use unless the licensee complies with the applicable regulations of the Department of Transportation in 49 CFR Parts 170-189.

49 CFR 173.393(h) states that no significant removable radioactive contamination shall be on the external surface of packages containing radioactive materials.

Contrary to this requirement, it was learned through statements of licensee representatives that wipe tests were not performed to ensure that no removable radioactive contamination was present on the packages of waste shipped from your laboratory.

This is a Severity Level IV violation (Supplement V).

2. License Condition No. 22 requires that all licensed materials be possessed and used in accordance with statements, representations and procedures contained in application dated January 23, 1981; and letters dated April 16, 1981, and July 8, 1981.

The license application dated January 23, 1981, states that the results of the area swab tests shall be recorded and filed.

Contrary to this requirement, the results of area swab tests were not always recorded. Specifically, records of the results of swab tests were not kept between the following dates:

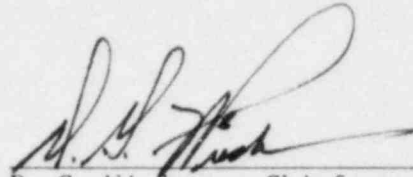

1. March 24, 1980, and July 28, 1980.
2. November 5, 1980, and May 26, 1981.
3. May 26, 1981, and July 30, 1981.
4. July 30, 1981, and December 21, 1981.
5. December 21, 1981, and July 29, 1982.

This is a Severity Level V violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
