NOTICE OF VIOLATION

Commercial Service Company

License No. 24-20165-01

As a result of the inspection conducted on August 20, 1982, and in accordance with the NRC Enforcement Policy, 47 FR 9987 (March 9, 1982), the following violations were identified:

1. License Condition No. 20 requires that licensed material be possessed and used in accordance with statements, representations, and procedures contained in application received May 20, 1981. Item 12 of the above referenced application states that whole body film badge service will be scheduled monthly for evaluation of radiation exposures to personnel working under the licensed program.

Contrary to the above, the NRC inspector learned through statements of licensee representatives that this requirement was not met. Specifically, no film badge service was being used between October 1981, and August 1982.

This is a Severity Level IV violation (Supplement VI).

2. License Condition No. 12A requires a leak test certificate from a transferor indicating that a test has been made within six months prior to the transfer; that a sealed source received from another person shall not be put into use until tested; and that each sealed source containing byproduct material be tested for leakage and/or contamination at intervals not to exceed six months.

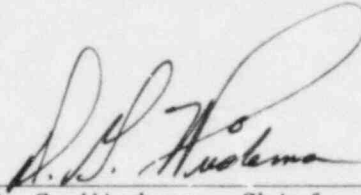

Contrary to the above, the NRC inspector learned through statements by licensee representatives and the absence of records that these requirements were not met. Specifically, no leak test record was available from the transferor at the date of purchase (October 1981) and from the licensee as of August 20, 1982. This is a period in excess of the required six months.

This is a Severity Level V violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
