SUBJECT: REPORT NO. 50-395/82-61

This refers to the routine safeguards inspection conducted by A. Tillman of this office on December 27-30, 1982, of activities authorized by NRC License No. NFP-12 at V. C. Summer and to the discussions of our findings held with Mr. W. A. Williams, General Manager Nuclear Operations, and Mr. J. Connelly, Deputy Plant Manager, at the conclusion of the inspection.

Areas examined during this inspection included your physical security program as implemented under the provisions of Title 10, Code of Federal Regulations, Part 73, "Physical Protection of Plants and Materials" and the specific requirements of your approved Security Plan. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, performance tests, and observations by the inspectors.

Within the scope of this inspection, no violations or deviations were disclosed.

We have examined actions you have taken with regard to previously identified enforcement matters. These are discussed in the enclosed inspection report.

One new unresolved item resulted from this inspection and is discussed in the enclosed report. This item will be examined during subsequent inspections.
