

CHAIRMAN

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

PDR

50-482

March 17, 1994

The Honorable Joan Finney  
Governor of Kansas  
State Capital  
Topeka, Kansas 66612

Dear Governor Finney:

It was a pleasure talking with you concerning our shared interest in the performance of the Wolf Creek nuclear plant.

The NRC staff is currently drafting the Systematic Assessment of Licensee Performance (SALP) for the period of October 10, 1992, to April 9, 1994. Although the NRC's senior managers responsible for assessing performance at Wolf Creek have not determined the SALP numerical ratings, the licensee was told in a recent inspection exit meeting that, in the staff's view, performance was improving.

During our conversation, I offered to send you a package of information on the performance of Wolf Creek. In preparing that information, it came to my attention that your office is on the service list for Wolf Creek and therefore your office already has all of the information that I would have sent. Rather than duplicate information your staff has already received, let me call to your attention that the SALP report will be issued on May 13, 1994, and that the inspection report documenting the improvement in performance mentioned above should be issued by the end of March. Both of these reports will be provided to your office.

If you have any questions or if I can be of assistance, please call me.

Sincerely,

Ivan Selin
