Docket No. 50-440
Docket No. 50-441

The Cleveland Electric Illuminating
Company
ATTN: Mr. Murray R. Edelman
Vice President
Nuclear Group
Post Office Box 5000
Cleveland, OH 44101

Gentlemen:

This refers to the NRC's Systematic Assessment of Licensee Performance (SALP) of the Perry Nuclear Generating Station and our meeting of January 14, 1983, to review the results of that assessment covering the period October 1, 1982, through September 30, 1982. A copy of the SALP 3 Report was provided for your review in advance of the meeting. Enclosed is the final SALP 3 Report that incorporates the SALP Board Chairman's letter to you and your letter of January 21, 1983.

In addition to the assessments and recommendations made by the SALP Board, it is my view that the overall regulatory performance of Cleveland Electric Illuminating Company at the Perry facility continued at a satisfactory level during the assessment period. I concur with the SALP Board findings that licensee and NRC attention in the electrical area should be maintained at a high level. In the radiological protection area, your increased management attention and program development efforts are acknowledged and will be reviewed as part of the NRC's routine inspection program.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the SALP Report will be placed in the NRC's Public Document Room.
