

Docket No. 30-16008

AUG 23 1982

License No. 20-19067-01

Baker Testing Services, Inc.
ATTN: Mr. Kenneth Baker
Vice President
25 Fottler Road
Hingham, Massachusetts 02043

Gentlemen:

Subject: Inspection No. 82-01

This refers to the routine safety inspection conducted by Ms. J. McGinness and Ms. J. Johansen of this office on July 29, 1982, at your home office in Hingham, Massachusetts, and at a field site in Hyde Park, Massachusetts, of activities authorized by NRC License No. 20-19067-01 and to the discussions of our findings held by Ms. McGinness and Ms. Johansen with yourself at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, measurements made by the inspector, and observations by the inspector.

Our inspector also verified the steps you have taken to correct the violations brought to your attention in the enclosure to our letter dated May 29, 1980. We have no further questions regarding the steps you took to correct items A and C. With regard to item B, this item was not fully corrected.

Based on the results of this inspection, it appears that certain of your activities were not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith as Appendix A. These violations have been categorized by severity level in accordance with the NRC Enforcement policy (10 CFR 2, Appendix C) published in the Federal Register Notice (47 FR 9987) dated March 9, 1982. You are required to respond to this letter; and, in preparing your response, you should follow the instructions in Appendix A.

Item A in the Notice of Violation enclosed with this letter was identified during a previous inspection of your licensed activities on April 30, 1980, and was documented in the enclosure to our letter dated May 28, 1980. Your letter to this office dated June 13, 1980 stated that field audits would be conducted of radiographers and radiographers assistants at three month intervals. From our July 29, 1982, inspection it appears that the stated corrective actions were not effective since this item has not been fully corrected. Recurrent and uncorrected violations are given additional weight in the consideration and selection of appropriate enforcement action. Therefore, in your response to this letter, you should give particular attention to those actions taken or planned to ensure that identified items of noncompliance will be completely corrected and will not recur.
