PRELIMINARY NOTIFICATION OF EVENT OR UNUSUAL OCCURRENCE -- PNO-IV-82-45A

This preliminary notification constitutes EARLY notice of events of POSSIBLE safety or public interest significance. The information is as initially received without verification or evaluation, and is basically all that is known by NRC staff on this date.

FACILITY: Omaha Public Power District
Fort Calhoun Station, Unit 1
(DN: 50-285)

Licensee Emergency Classification:
 Notification of Unusual Event
 Alert
 Site Area Emergency
 General Emergency
 Not Applicable

SUBJECT: EARLY COMMENCEMENT OF REFUELING OUTAGE

This updates PNO-IV-82-45 of December 6, 1982. Early estimates indicate that 4 to 5 weeks will be required for turbine repairs, since damage is believed to be more extensive than originally thought. The unit will be cooled down this evening (12/7/82), and the refueling outage scheduled to commence on January 4, 1983, will commence immediately.

CONTACT: W. D. Johnson, 728-8155; L. A. Yandell (402)426-9611.
