March 18, 1994

To: All Holders of EPRI Report NP-7243

Subject: Revision to EPRI Report NP-7243, "Investigation of Response Time Testing Requirements", May 1991

In the past year, EPRI has received comments from two pressure transmitter vendors (Camille Bauer and Weed) indicating that statements and recommendations made in the subject report regarding their products are inaccurate. EPRI has reviewed these comments and has decided to revise the subject report.

The new and revised pages to be included in the report are enclosed. Please include these pages with your current copy of the subject report and mark the appropriate pages of the existing report as "superseded" as noted. Please contact Mr. Revis James at (415) 855-2081 if you require additional information.

Sincerely,

John O'Brien, Program Manager
Operations & Maintenance
