0 2	On 8/17/82, during performance of Temporary Procedure 82-25, "SSW/RBCCW Heat Exchanger]
0 3	Performance Test" shutdown conditions were used to check individual SSW Pump flows
0 4	and the investigation revealed that PNPS Tech Spec. Section 4.5.1.b was deemed insuf-
0 5	ficiently conservative in establishing RBCCW heat removal capability. Successful
06	completion of Surveillance Procedure 8.5.3.2, written to Tech Spec criteria, was in-
0 7	adequate proof of satisfying FSAR RBCCW heat removal requirements. This event caused
0 84	no threat to the public because sufficient flow to RBCCW had been proven on 8/15/82.

10	SEQUENTIAL REPORT NO. IT REPORT NUMBER 2 2 23 24 26 27 28 29 30 31 32 32 32 34 36 37 40 41 42 43 43 44 47 47 ATTEMPT OF TAKEN ACTION AND CORRECTIVE ACTIONS 27 Inappropriate translation of FSAR Section 10.5.5.3 into Tech. Spec. criteria is the
	direct cause. An immediate Administrative requirement to use both T.P. 82-53 (a
1 2	revision of TP 82-25 with FSAR heat removal capability criteria) and Surv. #8.5.3.2
13	for any required testing will insure proper performance until Tech. Spec. revisions
114	can be accomplished.
