Dear Mr. Haynes:

This letter serves to provide the Commission with a clarification of the second interim report on the deficiency involving Water Hammer in the ESW System that was included in PLA-1258.

The point of clarification is that the corrective actions outlined were not intended to be completed prior to 5% power, but prior to exceeding 5% power.

We trust the Commission will find this clarification to be satisfactory.

Very truly yours,

B. D. Kenyon  
Vice President-Nuclear Operations
