ULNRC-2985

Gentlemen:

DOCKET NUMBER 50-483
CALLAWAY PLANT
REVISION TO TECHNICAL SPECIFICATION 3/4.6.2.3
CONTAINMENT COOLING SYSTEM
References: 1) NRC Inspection Report No. 50-483/
90012 (DRP), dated July 13, 1990
2) ULNRC-2339, dated December 11, 1990

Reference 2 transmitted an amendment application to revise Technical Specification 3/4.6.2.3 to delete the surveillance requirements to verify cooling water flow rates to the containment coolers. This deletion was justified by the implementation of the Callaway Plant Heat Exchanger Monitoring Program which was developed in commitments made in the response to Generic Letter 89-13. The amendment application was transmitted in response to commitments made in the Reference 1 NRC Inspection Report.

The purpose of this transmittal is to withdraw the amendment application submitted in Reference 2. This withdrawal is based on recent teleconferences between the NRC Staff and Union Electric Co. which concluded that the revised specification needed to more closely follow the latest Standard Technical Specifications and Amendment 50 approved for the Wolf Creek Nuclear Plant. We intend to resubmit an amendment application in the 4th quarter of this year.

Very truly yours,

Donald F. Schnell
