Samuel Chilk, Secretary
Office of the Secretary of the Commission

NRC LICENSE FEES

As you know, the Commission discussed the matter of license fees on November 3, 1981, and requested the staff to provide revised manpower rates based on the actual costs incurred for Fiscal Year 1981. Accordingly, please allocate the time spent by the Office of the Secretary in FY 1981 as follows:

<u>Allocation to the Office of</u>	<u>Office of the Secretary % Allocation</u>
Nuclear Reactor Regulation	
Nuclear Material Safety & Safeguards	
Inspection & Enforcement	
Nuclear Regulatory Research	
Other Office of Function (specify and give % allocation)	
Total	100%

The Commission's guidelines require that each office explain the basis for the distribution listed above. We have enclosed a copy of your submittal to us dated March 1, 1977, which was used in the last revision of the fee schedule.

After an examination of effort, if you find that a pro-rata distribution of your costs, based on Regulatory manpower, is appropriate, please provide a statement to this effect along with an explanation of how the determination was made.

Based on the urgency of this matter, please provide the information to Daniel J. Donoghue, Director, Office of Administration, by the c.o.b. November 9, 1981.

If you have questions concerning this request, contact William O. Miller 492-7225.
