NOTICE OF VIOLATION

Carman/Barton J. V. Construction

License No. 12-20214-01

As a result of the inspection conducted on August 17, 1982, and in accordance with the NRC Enforcement Policy, 47 FR 9987 (March 9, 1982), the following violations were identified:

1. License Condition No. 18 requires that licensed material be possessed and used in accordance with statements, representations, and procedures contained in application (with attachments) dated September 17, 1981. Item 12 of the above referenced application states that whole body film badge service will be scheduled monthly for evaluation of radiation exposures to personnel working under the licensed program.

Contrary to the above, the NRC inspector learned through statements of the licensee representatives and a review of records that this requirement was not met. Specifically, between October 1981, and January 1982, no film badge records were available and between February 1982, and August 1982, scheduled film badge service was not used.

This is a Severity Level IV violation (Supplement VI).

2. License Condition No. 12 requires that licensed material shall be used by or under the supervision and in the physical presence of only one named individual.

Contrary to the above, the NRC inspector learned through statements of the licensee representatives and a review of records that this requirement was not met. Specifically, since April 1982, the above referenced individual is no longer employed by the licensee and three other individuals have been using licensed material. (Campbell Pacific moisture-density gauge.)

This is a Severity Level IV violation (Supplement VI).

3. License Condition No. 18 requires that licensed material be possessed and used in accordance with statements, representations, and procedures contained in application (with attachments) dated September 17, 1981. Item 7 of the above referenced application states that a named individual will be designated as Radiation

8209130178 820908
NMS LIC30
12-20214-01 PDR

Protection Officer and assume the duties as described in the licensee's radiation safety program.

Contrary to the above, the NRC inspector learned through statements of the licensee representatives and a review of records that this requirement was not met. Specifically, between April 1982, and the date of this inspection the licensee had no authorized Radiation Protection Officer.

This is a Severity Level V violation (Supplement VI).

4. License Condition No. 18 requires that licensed material be possessed and used in accordance with statements, representations, and procedures contained in application (with attachments) dated September 17, 1981.

Your Technical Data Sheet No. 11C states that licensed material, when not in use, will be permanently stored at KilnGas Commercial Module, Chessen Lane, Alton, Illinois, 62002.

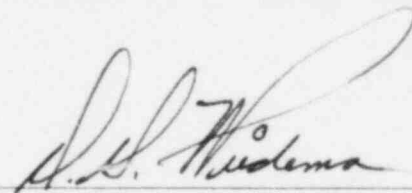

Contrary to the above, on the day of this inspection, the Campbell Pacific Nuclear Corporation Model MC-2 moisture-density gauge was stored at Barton Contractors, Inc., Route 111, South Roxana, Illinois, 62087.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
