Region I
475 Allendale Road
King of Prussia, PA 19406-1415

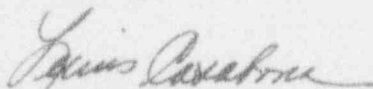

Subject: *Response to your letter dated January 10, 1994*

Dear Mr. Shanbaky:

In response to the above notice of violation contained in the above referenced letter, we submit the following information:

- Item 1 *Urine Analyses:*
The samples were taken during June but the analyses were not performed. The persons were resampled on Feb. 3, 1994 and the analyses are being conducted at Teledyne Isotopes. This will be performed on a regular schedule in the future.
- Item 2 *Quarterly Surveys:*
These will also be performed on a regularly scheduled basis by the Radiological Service Department of Teledyne Isotopes. A survey was conducted on Feb. 3, 1994.
- Item 3 *Oral Testing:*
Although the training was performed on 11/10/92, documentation of oral testing was not performed. The training program will be repeated within sixty (60) days of the date of this letter and oral testing will be documented on the Health Physics Training Record as detailed in the original application.
- Item 4 *Posting Requirements:*
We must have miscommunicated during the inspection since the Form NRC-3 was posted in two (2) areas of the plant; the lunch room and the bulletin board in the plant. We did not, however, have the notice pertaining to the license and the records posted and where they can be examined. These records are in a file cabinet at the plant. This item will be resolved in its completion within two (2) weeks.

Sincerely,

Lewis Casabona
R.S. O. for Degussa
