

JAN 8 1982

MEMORANDUM FOR: Robert Brown, Chief, Program Support Branch, NMSS
FROM: William O. Miller, Chief, License Fee Management Branch, ADM
SUBJECT: PROPOSED LICENSE FEE REVISION

As Mr. Donoghue indicated in the third paragraph of his memorandum dated January 4, 1982 to Mr. Davis, a fee program based on actual costs would require the Material Licensing Branch and the Material Certification and Procedures Branch to keep track of the actual professional staff hours and associated contractual services costs expended for each application for a new license, amendment and renewal.

When we developed the proposed schedule of revised fees for the fuel cycle licenses (contained in SECY 81-615), we were advised by the legal staff to show the expected range of application, amendment and renewal fees based on the actual professional staff hours expended for several cases in a fee category. To assist us in developing a proposed revision to the fee schedule, we request that your office provide us with a range of professional staff hours expended (Enclosure 1) for applications for new licenses, amendments and renewals of the small materials programs. The range for each category of license (\$170.31) would show the minimum costs (professional staff hours and contractual) and maximum costs to process a single application in the category. In addition, please indicate whether the midpoint of the range, which you establish for each category, would be a representative average that could be used in the event the Commission decides to continue the average cost method of determining license fees for small licensed programs. If the midpoint of the range is not a representative average, then please provide the average for each fee category.

We will be pleased to meet with you or members of your staff to discuss this request. If you have questions, please contact me (27225).

3. BYPRODUCT MATERIAL - CON'T

- E. Licenses for possession and use of byproduct material in sealed sources for irradiation of materials where the source is not removed from its shield (self-shielded units).
 - New License
 - Renewal
 - Amendment

- F. Licenses for possession and use of byproduct material in sealed sources for irradiation of materials where the source is exposed for irradiation purposes.
 - New License
 - Renewal
 - Amendment

- G. Licenses issued pursuant to Subpart B of Part 32 of this chapter to distribute items containing byproduct material or quantities of byproduct material to persons generally licensed under Parts 31 and 35 of this chapter, except specific licenses authorizing redistribution of items which have been manufactured or imported under a specific license and licensed by the Commission
 - New License
 - Renewal
 - Amendment

3. BYPRODUCT MATERIAL - CON'T														
L. All other specific byproduct material licenses, except those in Categories 4A through 10B.														
4. WASTE DISPOSAL														
B. Waste disposal licenses specifically authorizing the receipt of waste byproduct material, source material, or special nuclear material from other persons for the purpose of packaging the material. The licensee will dispose of the material by transfer to another person authorized to receive or dispose of the material.														
C. Waste disposal licenses specifically authorizing the receipt of <u>prepackaged</u> waste byproduct material, source material, or special nuclear material from other persons. The licensee will dispose of the material by transfer to another person authorized to receive or dispose of the material.
