

MAR 23 1994

Docket Nos. 50-277, 50-278

Mr. D. M. Smith  
Senior Vice President-Nuclear  
PECO Energy  
Nuclear Group Headquarters  
Correspondence Control Desk  
P. O. Box 195  
Wayne, Pennsylvania 19087-0195

Dear Mr. Smith:

SUBJECT: NRC Combined Inspection Nos. 50-277/94-02; 50-278/94-02

An announced inspection at the Peach Bottom Atomic Power Station was conducted by Mr. L. Eckert on January 25-28, 1994. The inspection findings were discussed with Mr. G. Edwards and other members of your staff on January 28, 1994. Additional information was provided by your staff members on February 7 and March 9, 1994.

Areas reviewed during the inspection are important to health and safety and are discussed in the enclosed inspection report. These areas included control of radioactive materials and contamination, surveys and monitoring; radiological discrepancy investigation; and the program for maintaining radiation exposures as low as reasonably achievable (ALARA).

The ALARA and contamination control programs were well implemented. Improvement was noted in developing more comprehensive corrective actions for radiological discrepancies. No safety concerns or violations of NRC regulatory requirements were identified.

No response to this letter is required. Your cooperation with us is appreciated.

Sincerely,

James H. Joyner, Chief  
Facilities Radiological Safety  
and Safeguards Branch  
Division of Radiation Safety  
and Safeguards

Enclosure: NRC Inspection Report No. 50-277/94-02; 50-278/94-02 and Attachments
