Region IV  
611 Ryan Plaza Drive, Suite 1000  
Arlington, Texas 76011

Reference: Docket No. 50-285

Dear Mr. Collins:

### Bunker Ramo Primary Containment Electrical Penetration Assemblies

IE Bulletin 82-04, dated December 3, 1982, identified potential deficiencies affecting safety in the subject penetration assemblies and requested specific actions be taken by licensees utilizing these assemblies in their power plants. The District recently completed a review to identify all penetration assemblies presently installed at the Fort Calhoun Station (FCS) and also reviewed all outstanding modification packages for possible purchase and use of Bunker Ramo assemblies in the future. The District has determined as a result of this review that no Bunker Ramo Company penetration assemblies are installed or presently planned for use at the FCS. Therefore, no further action is required by the District in accordance with Item 5a of the subject bulletin.

IE Bulletin 82-04 also requested that an estimate of the District's time spent in preparing this written response be provided. The District utilized approximately ten (10) manhours in review for and preparation of this response.

Sincerely,

*W.C. Jones*
