Dear Mr. O'Reilly:

BELLEVILLE NUCLEAR PLANT UNIT 1 - MAKEUP AND PURIFICATION LETDOWN COOLER  
SUPPORTS - SUPPLEMENTAL INFORMATION

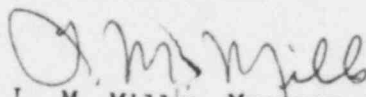

The subject deficiency was initially reported to NRC-OIE Inspector  
R. W. Wright on February 26, 1980 in accordance with 10 CFR 50.55(e) as  
NCR NEB 80-4. This was followed by our final report dated March 27, 1980.

As discussed with Inspector Paul Fredrickson by telephone on February 8, 1983,  
TVA failed to complete corrective actions as specified in our final report on  
this matter. This failure led to violation 438,439/81-29-01 to which TVA  
responded on January 21, February 10, and June 18, 1982. Our June 18 letter  
stated that corrective actions would be completed by June 1, 1983. Accordingly,  
we are revising our date for completion of corrective actions on NCR NEB 80-4 to  
June 1, 1983.

If you have any questions, please get in touch with R. H. Shell at  
FTS 58-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

  
L. M. Mills, Manager  
Nuclear Licensing
