Gentlemen:

Haddam Neck Plant
Millstone Nuclear Power Station, Unit No. 1
Status of Unresolved Safety Issues

By References (1) and (2), Connecticut Yankee Atomic Company (CYAPCO) and Northeast Nuclear Energy Company (NNECO) were requested, pursuant to 10CFR50.54(f), to provide information relating to the status of and progress towards completion of the unresolved safety issues (USI). CYAPCO and NNECO personnel have discussed this matter with various members of the NRC Staff in an attempt to ascertain what specific information was being requested. Several of the issues raised by Reference (3), docketed by the Yankee Atomic Company, are applicable to the Haddam Neck Plant and Millstone Unit No. 1 as well.

Reference (4) provides some clarification which, although not issued on our dockets, we are interpreting to be applicable to References (1) and (2). Specifically, Reference (4) requests licensees to confirm the applicability of the NRC Staff generic positions and conclusions developed on individual unresolved safety issues.
