Reference: Letter NA 92-0073, dated October 28, 1992, from
R. C. Hagan, WCNOG to U. S. Nuclear Regulatory
Commission
Subject: Docket No. 50-482: Wolf Creek Generating Station Cycle 7
Core Operating Limits Report, Revision 1

Gentlemen:

Attached is the Cycle 7 Core Operating Limits Report (COLR), Revision 1, for the Wolf Creek Generating Station (WCGS). The reference transmitted Wolf Creek Nuclear Operating Corporation's license amendment request to allow the relocation of cycle-specific parameters to the COLR which was subsequently approved by Amendment No. 61 to the operating license. This document is being submitted pursuant to Section 6.9.1.9 of the WCGS Technical Specifications. Figure 2 "Axial Flux Difference as a Function of Thermal Power," of the COLR has been revised to reflect a moderator temperature increase which was approved by Amendment No. 72 to the operating license.

If you have any questions concerning this matter, please call me at (316) 364-8831 extension 4450 or Mr. Kevin J. Moles at extension 4565.

Very truly yours,

Otto L. Maynard
