RECEIVED  
EXPORT  
AND  
INTERNATIONAL SAFEGUARDS

XU08460

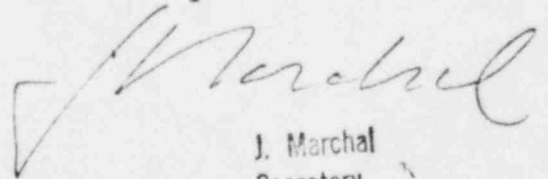

Subject: Export license XUO 8460 as amended (export of natural uranium of US origin to BNFL, United Kingdom, for conversion and subsequent return to the USA for enrichment)

Our refer.: AGN/464

Dear Mr. Zimmerman,

This is to inform you that part of the material exported under above license will not be returned to the US. In fact, about 1.3 million lbs of U 308 shipped last year have now been purchased by Community companies and will be enriched within the Community for the fueling of the nuclear power plant ISAR II in West Germany.

Sincerely

J. Marchal  
Secretary  
Nuclear Supply
