Directorate
Division of Operating Reactor Support

Reference: (a) License No. DPR-3 (Docket No. 50-29)
(b) Letter, J. M. Grant to M. Fairtile, Effluent
and Waste Disposal Semiannual Report, March
1, 1994.

Dear Mr. Fairtile:

Subject: EFFLUENT AND WASTE DISPOSAL SEMIANNUAL REPORT

Enclosed are the tables that summarize the quantities of radioactive liquid and gaseous effluent and solid waste released from the Yankee Nuclear Power Station (YNPS) at Rowe, Massachusetts for the third and fourth quarters of 1993. These tables are submitted in accordance with YNPS Defueled Technical Specification 6.8.2.b. No changes have been made to the Offsite Dose Calculation Manual or Process Control Program during the period covered by the attached report.

During final review of the enclosed tables, two items were identified that require change. The first item is a typographical error on the gross alpha radioactivity for gaseous releases presented in Table 1A. This has been amended. The second item is that several solid waste shipments were inadvertently omitted from Table 3. We will amend the report with this information at the earliest possible date. We apologize for any inconvenience that this may have caused. An errata sheet is enclosed for the update of Reference (b).
