In re: License No. 34-01197-01

Dear Mr. Bowyer:

In support of our request for possession and use of a molybdenum 99/technetium 99m generator, we submit the following:

1. The survey meter we are using, which is capable of measuring exposure rates as high as one roentgen per hour, is made by Jordan Electronics, Inc., Model AGB 10K SR.
2. Radiation exposure of personnel is evaluated by individual Victoreen radiation dosimeters which are recorded and charged on a monthly basis.

Sincerely yours,

W. J. Feyen
