Gentlemen:

TECHNETATED (Tc-99m) AGGREGATED ALBUMIN (HUMAN) FOR LUNG IMAGING

The commercial kit(s)\*requested in your application to prepare technetated (Technetium-99m) aggregated albumin (human) for lung imaging is not distributed under a product license issued by Secretary, Department of Health, Education, and Welfare. You may reapply for use of the kit when a product license is issued by the Secretary, HEW, for distribution of the product and when radiological safety review is completed by this office. You should determine the status of products from the supplier or Secretary, HEW, so that you may make appropriate application.

A prepackaged product is available from a manufacturer who holds such a product license. You may apply for the routine use of prepackaged technetated aggregated albumin for lung imaging.

Sincerely,

John E. Bowyer  
Materials Branch  
Directorate of Licensing  
Regulation
