Docket No. 50-346

License No. NPF-3

Serial No. 912

February 17, 1983

Director of Nuclear Reactor Regulation  
Attention: Mr. John F. Stolz  
Operating Reactor Branch No. 4  
Division of Operating Reactors  
United States Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Stolz:

In our letter dated August 13, 1982 (Serial No. 847) Toledo Edison provided our plan to submit supplemental ECCS calculations using the cladding models of NUREG-0630 by March 1, 1983. As part of a group of utilities sponsoring the analysis, we find the results will not be provided to us as expected to meet the March 1, 1983 submittal date. Therefore, for the Davis-Besse Nuclear Power Station Unit No. 1 we plan to submit the proposed calculations by April 8, 1983.

As discussed previously, the implementation schedule for permanent modifications to the ECCS evaluation models will be provided at a later date.

Very truly yours,

A handwritten signature in cursive script that reads 'R.P. Crouse'.
