

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

MAY 26 1982

MEMORANDUM FOR: Darrell G. Eisenhut, D/DL
Office of Nuclear Reactor Regulation

FROM: Joseph D. Lafleur, Jr., Deputy Director
Office of International Programs

SUBJECT: EXPERT REVIEW OF KRSKO STEAM GENERATOR CHANGES

Confirming my telecons with T. Ippolito, G. Lainas, and D. Crutchfield today, and the agreement reached May 13 with NRR, NRC has agreed to have our experts review the changes being proposed by Westinghouse in the D-4 type Steam Generators of the Krsko Nuclear Power Plant. Nine copies of all the material received from the Yugoslavs on May 25 are attached.

During the Yugoslav visit with Chairman Palladino on May 25, a review prior to the completion of modification of the steam generators was requested. This would require us to telegraph our experts' comments on or before June 25. The Yugoslavs also requested that we advise them within a few days of what additional information will be needed for our review.

Please call me if you have any questions.

Joseph D. Lafleur, Jr.
Deputy Director
Office of International Programs

Enclosures:

1. Rev. 7 and 8, Krsko NPP drawing
2. System Design Description
3. Preheat Steam Generator, Customer Working Group Meeting
