Gentlemen:

Thank you for your letter dated January 21, 1983, in reply to our letter and Notice of Violation dated December 8, 1982. Based on our review, we have no further questions at this time.

We would note that Procedure 7.5.6.3 was erroneously identified in place of Procedure 7.5.6.5 in NRC Inspection Report 50-298/82-30.

As a matter of clarification, the proposed Technical Specification change which you have described is an acceptable method of eliminating any uncertainty which may exist in the area of procedure review requirements. We will, however, continue to interpret the time period specified in Technical Specification 6.2.1.A.4.j as allowing a maximum of 24 months until such time as this Technical Specification is changed.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,

"Original Signed by:
