ATTN.: DR. JOSEPH D. LAFLEUR

THANKS FOR TELEX JUNE 10 WITH INTERIM REPORT. ALL AVAILABLE  
REQUESTED INFORMATION WAS FORWARDED THROUGH MR. TEDESCO.

IN CASE OF SG MODIFICATION OUR INSTITUTE STARTED EXTENSIVE REVIEW  
EFFORT AND PRELIMINARY FINDINGS WERE PRESENTED ALSO TO THE MISSION.  
IN MANY TOPICS OUR CONCLUSIONS WERE SIMILAR TO YOUR TASK FORCE  
CONCLUSIONS.

DUE TO LACK OF INFORMATION WE WOULD APPRECIATE ANSWERS TO FOLLOWING:

1. WHICH WESTINGHOUSE US PLANTS ARE OPERATING WITHOUT LOW FEED  
FLOW TRIP (STEAM/FEED MISM AND LOW SG LEVEL).
2. FROM WHICH WESTINGHOUSE US OPERATING PLANTS THE LOW F.FLOW TRIP  
WAS DELETED PRIOR TO O1 AND AFTER O1.
3. WHAT IS THE PRESENT NRC POSITION WITH RESPECT TO LOW FEED FLOW  
TRIP. IN CASE OF DELETION ARE THERE ANY ALTERNATE MEANS OF  
PROTECTION.
4. WERE THERE ANY BEST ESTIMATE COMPARATIVE ANALYSES PERFORMED  
FOR THE LOSS OF FW ACCIDENT FOR THE CASE OF LOW-LOW S/G LEVEL  
TRIP VERSUS LOW FW FLOW TRIP.

WE ARE AWAITING YOUR FURTHER COMMENTS ANNOUNCED FOR JUNE 25.

BEST REGARDS, BORUT MAVKO
