Reference (1) responded to I & E Inspection 50-245/81-13 which was forwarded to us by the Staff in Reference (2). In Reference (1), our response to Finding Example (A) stated that the requirement to calculate and record the average control insertion times on RE Form 1051-3, Control Rod Scram Test Data Summary, would be deleted. Additional review has shown that this information is useful in appraisal of test results, and will therefore remain on the test data sheet as a part of the required data reduction.
