

DEC 3 1982

Docket: 50-267/82-28

Public Service Company of Colorado
ATTN: O. R. Lee, Vice President
Electric Production
P. O. Box 840
Denver, Colorado 80201

Gentlemen:

This refers to the Systematic Assessment of Licensee Performance (SALP) Board Report of the Fort St. Vrain Nuclear Station. The SALP Board met on November 2, 1982, to evaluate the performance of the subject facility for the period September 1, 1981, through August 31, 1982. The performance analyses and resulting evaluation are documented in the enclosed SALP Board Report. These analyses and evaluation will be discussed with you onsite on December 14, 1982.

The SALP Board evaluation process consists of categorizing performance in each functional area. The categories which we have used to evaluate the performance of your facility are defined in Section II of the enclosed SALP Board Report. As you are aware, the NRC has changed the policy for the conduct of the SALP program based on our experiences and the recently implemented reorganization which emphasizes the regionalization of the NRC staff. This report is the product of the revised policy.

Any comments which you may have concerning our evaluation of the performance of your facility should be submitted to this office within 20 days of the date of this letter. Your comments, if any, and the SALP Board Report, will both appear as enclosures to the Region IV Administrator's letter which issues the SALP Report as an NRC Report. In addition to the issuance of the report, this letter will, if appropriate, state the NRC position on matters relating to the status of your safety program.

Comments which you may submit at your option, are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
