Docket No. 50-266
Docket No. 50-301

Wisconsin Electric Power Company
ATTN: Mr. Sol Burstein
Executive Vice President
Power Plants
231 West Michigan
Milwaukee, WI 53201

This refers to the routine safeguards inspection conducted by Messrs. J. Belanger and J. Kniceley of this office on August 9-13, 1982, of activities at Point Beach Nuclear Plant authorized by NRC Operating Licenses No. DPR-24 and No. DPR-27 and to the discussion of our findings with Mr. G. A. Reed and other members of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in noncompliance with NRC requirements, as described in the enclosed Appendix. With respect to items 1, 2, 3 and 5.a, the inspection showed that action had been taken to correct the identified noncompliances and to prevent recurrence. Consequently, no reply to these items of noncompliance is required and we have no further questions regarding these matters at this time.

Regarding the remaining items (Items 4 and 5.b), a written response is required.

The inspection also identified two concerns relating to personnel access controls to the protected area, and the maintenance of security related equipment. Discussions with your personnel on site disclosed that appropriate corrective actions are being taken on these matters. We will examine these areas on future inspections.
