CONFIDENTIAL

February 26, 1982

Mr. H. W. Crocker U. S. NRC Region I 631 Park Avenue King of Prusia, PA 19406

Dear Bud:

On Thursday, March 11, 1982 a full scale Susquehanna SES site accountability drill will be conducted. This drill will test accountability for all site personnel including Units 1 & 2, construction and sub contract personnel. Due to the complexity of coordinating an exercise of this magnitude (over 4,000 site personnel will participate), the March 18 exercise will not include a full site accountability.

Please arrange to have observers available to critique this exercise for a preexercise briefing at 1:00PM on the 11th. At that time the accountability procedures will be reviewed with all referees and observers; shortly after this briefing the exercise will be initiated.

An exercise critique will be conducted onsite at 9:00AM March 12, 1982. The specific location for the pre-exercise briefing and critique will be provided to you during our March 2, 1982 meeting in Berwick. Your observer(s) are welcome to participate in the March 12 critique or incorporate their comments in the post March 18th exercise critique.

Please confirm at your earliest convenience, your participation as observers and the names of the observers for this March 11th accountability drill.

Sincerely,

Charles R. Wike, Jr.
