Docket Nos.: 50-440
and 50-441

Mr. Murray R. Edelman
Vice President-Nuclear Group
The Cleveland Electric Illuminating Company
Post Office Box 5000
Cleveland, Ohio 44101

Dear Mr. Edelman:

Subject: Request for Revised QA Program Description for Design and
Construction of the Perry Nuclear Power Plant (Units 1 & 2)

By letter dated September 22, 1982 (D. R. Davidson to A. Schwencer) CEI submitted its Corporate Nuclear QA Program Manual for NRC staff review, which reflects revisions to the QA Program description for the design and construction of the Perry plant. The NRC staff has completed its review of the Manual and finds that, as a manual for CEI personnel, it does not provide sufficient information which the staff requires to find a utility's QA program description acceptable. The prime example of this is Appendix I to the Manual entitled, "Regulatory Guides and Standards Reference Index," which lists Regulatory Guides, their referenced ANSI Standards with title and date, and references to "appropriate sections" of a project administration document. While some of the ANSI Standards are referenced, most are not. Furthermore, there is no commitment to comply with the Regulatory Guides listed in Appendix I. A second example of this is the lack of commitments and absence of the QA Program description of CEI's principal contractors (e.g. GE, Gilbert Associates, Kaiser Engineering).

It is therefore requested that CEI provide an updated description of the QA Program for Perry design and construction indicating specifically where the program has been revised relative to the program reviewed and accepted by the staff and documented in the Perry Preliminary Safety Analysis Report. It is suggested that the revised QA Program description be submitted in an amendment to the Perry Final Safety Analysis Report so that NRC staff evaluation findings may be reported in a future supplement of the Perry SER (NUREG-0887). It is also requested that a copy of the revised QA Program description be sent directly to the NRC Region III office to the attention of: Frank Hawkins, Quality Assurance Section, Division of Engineering and Technical Inspection.
