U. S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

SUBJECT: Annual Environmental Operating Report for Facility
Licenses NPF-37 and 66

Dear Mr. Martin:

Byron is submitting the Annual Environmental Operating Report as required by the Operating License, Appendix B, Section 5.4 for Facility Licenses NPF-37 and 66. The period of the report is from January 1, 1993 to December 31, 1993.

The report was reviewed against the objectives of the Environmental Protection Plan as stated in Section 1.0 Appendix B to the Operating License, and it has been determined that these objectives are being met.

A summary and analysis of the results of environmental protection activities required by Appendix B, Section 4.2 are provided in Attachment A.

There were no non-compliances to the Environmental Protection Plan; therefore, no corrective actions were required by Appendix B, Section 5.4.1(1). A change in station design which involved a potentially significant unreviewed environmental question as defined in Section 3.1 is described in Attachment B. There were no non-routine reports submitted per Section 5.4.2.
