In the Matter of
BIG ROCK POINT PLANT
(Consumers Power Company)
Docket No. 50-155 (Spent Fuel Expansion)

Dear Mr. Semmel:

On September 20, 1982, Mr. David Hoffman of the Consumers Power Company and I discussed Commissioner Roberts' scheduled visit to the Big Rock Point Nuclear Plant on Tuesday, September 28, 1982. This visit will be in conjunction with the ceremony on September 27, 1982, marking the 20th year of commercial operation of that facility and also would be part of Mr. Roberts' ongoing efforts to familiarize himself with various facilities that the Commission licenses.

Mr. Hoffman indicated that, in view of the limited time available in Mr. Roberts' schedule, Licensee would prefer to limit the size of the party during the tour. Therefore, Licensee would prefer that representatives of the Intervenor in the Big Rock Point spent fuel pool proceeding not accompany Commissioner Roberts on his tour. It is my understanding that Intervenor visited the facility in July 1982.

In view of the above, Mr. Roberts plans to proceed with his visit in the manner suggested by Licensee. He does not intend to discuss any substantive matters at issue in the proceeding. Moreover, he plans to serve on the parties to the spent fuel pool proceeding a report describing his visit.

I trust this procedure will be helpful to you.

Sincerely,

Gary G. Zech
Technical Assistant to
Commissioner Roberts
