MEMORANDUM FOR: Harold Denton, Director
Office of Nuclear Reactor Regulation

FROM: Roger J. Mattson, Director
Division of Systems Integration, NRR

SUBJECT: REVIEW PLAN FOR TECHNICAL ISSUES ON MCGUIRE TECH SPECS

Reference: Memorandum, Denton to Eisenhower and Mattson,
"Differing Professional Opinion of Mr. Licciardo
Regarding McGuire Technical Specification."
dated March 21, 1984.

In the reference memorandum you directed OSI, in coordination with DL, to establish a review plan for the technical issues that were raised in R. Licciardo's Differing Professional Opinion (DPO) on the McGuire Technical Specifications. The purpose of this memo is to forward to you our proposed review plan, which has been concurred in by DL.

Our first priority in dealing with the technical issues will be to get them clarified. Mr. Licciardo has been assigned this task. He has been asked to make this clarification in the form of questions of the type typically asked of licensees and applicants. The memo making this assignment is enclosed for your information. Mr. Licciardo has indicated that he is identifying new concerns as part of his documentation efforts. He has been requested to clearly distinguish in his questions those that are old and those that are new.

Based on Mr. Licciardo's estimate, we have allocated 4 weeks for him to perform this recasting of his concerns, with completion scheduled for COB April 27, 1984. RSB management will review the question set prepared by Mr. Licciardo before transmitting them to DL.

Once the management review is completed, the Director, OSI will forward the questions, amended where necessary, to the Director, DL. RSB will work with DL and try to resolve as many concerns in house as possible.

APR 30 1984

For those that cannot be resolved in-house and appear to be valid discrepancies, DL will initiate appropriate action for their resolution by the licensee.

Per your request, I will provide you with a status report on the progress of resolution by May 15, 1984.
