Dear Mr. DelGeorge:

Subject: Control of Heavy Loads - NUREG-0612 - Byron/Braidwood

Enclosed is a copy of a draft technical evaluation report (TER) for Byron and Braidwood which was developed based on your responses to Section 2.1 of the December 22, 1980 generic letter on "Control of Heavy Loads." This draft TER was prepared by the Idaho National Engineering Laboratory (INEL) under technical assistance contract to the NRC. We request that you review and comment on the TER. We request, further, that after a review period of about four weeks a conference call be arranged to resolve questions listed in the draft TER. A representative of INEL will participate in the conference call.

In the Byron Safety Evaluation Report, the staff concluded that your implementation of the interim actions of NUREG-0612, "Control of Heavy Loads at Nuclear Power Plants" provided reasonable assurance of safe handling of heavy loads until the guidelines of NUREG-0612 can be fully implemented. While that evaluation still applies, the staff does intend to issue an evaluation in a future supplement based in the final TER, to be issued by INEL after this conference call. Further questions should be directed to the licensing project manager, S. Chesnut.

Sincerely,

Original signed by:

B. J. Youngblood

B. J. Youngblood, Chief
Licensing Branch No. 1
